"**Fish**" comes from the Drag Term in being Flawless; Female Realness. "**Candy**" comes from the definition in itself, characterized by the use of a significant amount of sugar, or, in the case of sugar-free candies - by the presence of sugar substitutes; *i.e. an amenity of accessories*

Candies can be classified into noncrystalline and crystalline types.

Noncrystalline Candies may be chewy or hard; *i.e. the Bitter, Catty Drag Queens.*

Crystalline Candies incorporate small crystals in their structure and are creamy and or can easily melt; *i.e. the Hearty, Congenial Drag Queens.*

The combination from the classifications of "Candies", in terms of Drag Queens and "Fishy Realness" comes FishCandy.
